PROJECTS

Intelli-Helmet – Smart Safety System for Two-Wheelers

· Designed and developed a smart helmet by integrating sensors to enhance rider safety. The system ensures the vehicle starts only when the helmet is worn, incorporates an alcohol-detection sensor to prevent the bike from starting if alcohol is detected, and includes a drowsiness-detection module that tracks eye movement to identify signs of fatigue, triggering an alert beep to keep the rider awake. Combined embedded sensor integration with real-time safety logic to reduce road accident risks.
